23. Problem: (use additional Sheets if necessary) Perl 5.6.1 for the Irix 6.5 platform was built in mid-February 2002. A new version of Sybase Open Client has been recently PSRed. The Sybase-DBD Perl Modules require links to Open Client during compilation. A new version of Perl that includes the rebuilt Sybase-DBD module against the latest Sybase Open Client needs to be installed and tested by SWIT. It then will need to be installed in the PVC to validate against NCR #34493 for SQS.						
24. Proposed Solution: (use additional sheets if necessary) Install the Perl tar file in the EDF for SWIT testing in a timeframe that will enable testing of this Perl version in the PVC against NCR #34493.						
25. Alternate Solution: (use additional sheets if necessary) None.						
26. Consequences if Change(s) are not approved: (use additional sheets if necessary) This new version of Perl may resolve the NCR issue or at least allow DDM to narrow the problem scope.
